MSC IN ECONOMICS AND BUSINESS ADMIN.
- LOGISTICS AND SUPPLY CHAIN MANAGEMENT*
GETTING IT RIGHT: PRODUCT, AMOUNT, TIME, PLACE AND CUSTOMER

Learn to plan and control the flow of goods and information in a supply chain using IT-based analytics. In the Logistics and Supply Chain Management programme, you will gain skills that will enable you to design a highly efficient strategy for supply chain management that can be applied to a diverse range of businesses.

MAKING IT WORK
In the programme you will acquire nuanced analytical skills with which to systematically and creatively solve a range of complex logistical problems. You will also develop a strong fundamental understanding of the complexities and entities of the value chain.

Logistics and Supply Chain Management is a very demanding programme that calls for active student participation, communication, and strong time-management skills.

PROGRAMME STRUCTURE
Students are encouraged to do an internship during their degree – and AU supports its students by giving them an opportunity to do this. Companies like Vestas, Arla, Terma, and Siemens regularly provide projects for students on the programme. Nearly all students write their master’s thesis for a company. Generally, students work with companies that face challenging logistics problems which they want students to help them solve. Previous collaborative projects by Logistics and Supply Chain Management students have been conducted with the supplier relationship management division at LEGO, production planning by SAP at Danish Crown, inventory control at TDC, warehouse management at Arla, forecasting at Danfoss, and location of distribution centres at Bauhaus.

STUDENT LIFE
Aarhus BSS hosts a rich and varied programme of activities for you as a student, both study-related and social. Our many student associations host events ranging from lectures and company events to career days and sports days. Friday bars and celebrations, so there is plenty of scope for meeting and networking with like-minded people, discovering new areas of academic interest, and socialising with fellow students. In addition, SULO, the Logistics and SCM programme’s own student association, arranges company visits, study trips and social events for logistics students.

CAREERS
Graduates with the MSc in Logistics and Supply Chain Management have found jobs analysing logistical performance or implementing new logistical solutions. They may start under the supervision of experienced colleagues and rapidly progress to managerial and executive roles. AU’s holistic, analytical approach to logistics and supply chain management allows our graduates to be versatile in their future careers and to find success across a variety of sectors. Previous graduates have worked as project managers, economists, analysts, and consultants.

Laugé Valentin
MSc in Logistics and Supply Chain Management
Senior Director of Supply Chain Process Excellence, LEGO Group

The reason I chose to study Logistics and Supply Chain Management was the strong link between quantitative sciences and organisational leadership. At the time I could clearly see that logistics and supply chain management would only grow in importance, which turned out to be a safe prediction. I now have global responsibility for supply chain process excellence. I run a portfolio of teams for the LEGO Group that focus on constantly pushing for excellence in essential capabilities for our supply chain. These include demand planning, advanced analytics and business intelligence.

AARHUS BSS
Aarhus BSS (School of Business and Social Sciences) is one of Aarhus University’s four faculties. With approximately 13,000 full-time students, several thousand part-time students, more than 230 PhD students and more than 590 faculty members, Aarhus BSS ranks among the largest business schools in Europe and is Denmark’s biggest business and social sciences unit at university level. Building on its broad academic base, it encompasses both traditional business and social science disciplines.

LEARNING IN AN INTERNATIONAL CONTEXT
At Aarhus BSS, we conduct research and teaching at the highest academic level. We are dedicated to imparting to our students exactly the knowledge, skills and experience that are in demand – the skills that are essential for engaging in professional business activities in a global marketplace.

Our broad scope enables us to attract researchers, lecturers and students from all over the world. With their help, we have built an international environment in which academic and cultural views are exchanged, experiences gathered, and friendships formed.

Our students are encouraged to take a semester abroad at one of Aarhus BSS’s approximately 300 partner universities around the world. Studying abroad is an excellent opportunity for you to expand your horizon academically, culturally and personally, and for you to acquire valuable international experience and qualifications that are in high demand in companies and organisations everywhere.
