About the IP Phone 2002

The Nortel Networks IP Phone 2002 brings voice and data to the desktop by connecting directly to a Local Area Network (LAN) through an Ethernet connection.

**Note 1:** Not all features are available on all telephones. Consult your system administrator to verify which features are available for your use.

**Note 2:** In this guide, programmable line (DN)/feature key labels display beside the key, and soft key labels display directly above the key. Figure 1 shows key labels.

**Figure 1: Programmable line (DN)/feature key and soft key labels**

---

**Basic features**

The IP Phone 2002 supports the following features:

- four programmable line (DN)/feature keys (self-labeled)
- four soft keys (self-labeled) providing access to a maximum of ten features
Note 1: Your IP Phone 2002 may not be configured to support soft key functionality. Consult your system administrator.

- multi-field LCD display screen
- speaker for on-hook dialing or on-hook listening
- volume control bar for adjusting ringer, speaker, handset, and headset volume
- six specialized fixed keys:
  - Quit
  - Directory
  - Message (Inbox)
  - Outbox/Shift (reserved for future development)
  - Services
  - Expand to PC
- four call processing fixed keys:
  - Hold
  - Goodbye
  - Handsfree
  - Mute
- shared LAN access with a PC
- headset jack with On/Off key
- automatic network configuration
- hearing-aid compatibility
Figure 2 shows the IP Phone 2002.

**Figure 2: IP Phone 2002**

### Telephone controls

**Note:** Your IP Phone 2002 may come with optional key caps. Text in parenthesis indicate labels appearing on the key caps. For example, (Services).

Use the **Volume control** bar to adjust the volume of the ringer, handset, headset, speaker, and the Handsfree feature. Press the right side of the rocker bar to increase volume, the left side to decrease volume.
**Programmable line (DN)/feature keys** are extra DNs or feature keys used to access additional features.

A steady LCD light beside a line (DN) key indicates that the feature or line is active. A flashing LCD indicates the line is on hold or the feature is being programmed.

Use the **Goodbye** key to terminate an active call.

Press the **Hold** key to put an active call on hold. Press the line (DN) key beside the flashing LED indicator to return to the caller on hold.

Press the **Message (Inbox)** key to access your voice mailbox.

Use the **Navigation** keys to scroll through menus and lists appearing on the LCD display screen.
Press the **Services** key and use the navigation keys to access the following items:

- **Telephone Options:**
  - Volume adjustment
  - Contrast adjustment
  - Language
  - Date/Time
  - OnHook Default Path
  - Display diagnostics
  - Local Dialpad Tone
  - Ring type
  - Change feature key label
  - Set Information

- **Password Admin:**
  - Station Control Password

- **Display Network Diagnostics Utilities**

*Note:* Only your system administrator or service provider can use Display Network Diagnostics Utilities to perform Internet diagnostics.
About the IP Phone 2002

- Virtual Office Login and Virtual Office Logout (if Virtual Office is configured)
- Test Local Mode and Resume Local Mode (if Media Gateway 1000B is configured)

**Note 1:** Press the **Services** key to exit from any menu or menu item.

- The **Password Admin** menu may not be available on your IP Phone 2002. Consult your system administrator.

Press the **Headset** key to answer a call using the headset or to switch a call from the handset or handsfree to the headset.

Press the **Speaker** key to activate handsfree. The speaker LED indicator lights to indicate when handsfree is active.

Press the **Directory** key to access directory services.

Press the **Mute** key to listen to the receiving party without transmitting. Press the **Mute** key again to return to two-way conversation. The **Mute** key applies to handsfree, handset, and headset microphones. The Mute LED indicator flashes when the Mute option is in use.
Soft keys (self-labeled) are located below the display area. The LCD label above the key changes, based on the active feature.

*Note:* When a triangle appears before a key label, the feature is active.

Press the More.. key to access the next layer of Soft keys (self-labeled).

When a message is left for the user, the Message waiting indicator flashes. Also, this indicator flashes when the set ringer is ON.

Press the Quit key to end an active application. Pressing the Quit key does not affect the status of calls currently on your telephone.

The Expand to PC key is a fixed key reserved for future development.

The Outbox/Shift key is a fixed key that is reserved for future development.
Telephone display

The IP Phone 2002 has two display areas:

- The upper display area contains single-line information for items such as caller number, caller name, feature prompt string, user-entered digits, date and time information, and set information.
- The lower display area provides soft key label information.

Figure 3 shows an idle LCD display screen.

**Figure 3: IP Phone 2002 LCD display screen**
Call features and Flexible Feature Codes

System administration is required for call features and Flexible Feature Codes (FFCs). Contact your system administrator to configure these features and codes on your telephone.

Call features and FFCs must be assigned to your telephone and supported by system software.

Security features

Your Station Control Password (SCPW) enables the following security features:

- Electronic Lock to prevent others from making calls from your telephone.
- Password-protected telephone features (for example, Personal Directory, Redial List and Callers List).

Your initial SCPW is defined by your system administrator. Please contact your system administrator for detailed information.

To change your SCPW:

1. Press the Services key.
2. Press the Up/Down navigation keys to scroll and highlight Password Admin.
3. Press the Select key.
4. Use the dial pad to enter your password at the prompt.

5. Press the Up/Down navigation keys to scroll and highlight New Password.

6. Press the Select key.

7. Use the dial pad to enter the new password.

8. Press Select to accept the new password.

Note: If you have been locked out of your IP Phone 2002, or have forgotten your SCPW, please contact your system administrator.

Note: The default setting for Password Protection is off.

To turn Password Protection On/Off:

1. Press the Directory key.

2. Press the Up/Down navigation keys to scroll and highlight Change Protection Mode.
3. Use the dial pad to enter your password (if Password Protection is enabled).

4. Press the Enter key.

5. Press the Up/Down navigation keys to highlight one of the following:
   — Enable Password Protection
   — Disable Password Protection

6. Choose one of the following:
   — Yes to accept the selection.
   — No to return to the Directory menu.

7. Press the Done key.
Enter and edit text

You can enter and edit text on your IP Phone 2002 using the following methods:

• Enter and edit text using the telephone dialpad.
• Edit text using the soft keys.

Enter text using the dialpad

You can use the dialpad to enter text when you use features such as Personal Directory, Redial List, and Callers List.

For example, if you want to use the letter “A”, press the number 2 key once. If you want the letter “C”, press the number 2 key three times.

Note: No letters are associated with the number 1 or the 0 keys.

Edit text using the soft keys

You can use soft keys to edit text when you use features such as Personal Directory, Redial List, and Callers List.

To edit an entry in your Personal Directory, press the Directory key, and select the desired entry from your Personal Directory.

To edit text:

1. Press the Edit soft key.
2. Press the Left/Right navigation keys to move through the text.
3. Select the appropriate editing soft key for the operation you want to perform.
4. If the key you want is not visible, press the More.. soft key to access additional soft keys (self-labeled).
5. Press the Up navigation key to access the symbols.
6. Press the Left/Right navigation keys to move to a specific symbol.
7. Press the **Choose** soft key to select a symbol.
8. Press the **Next** soft key to submit your changes.

Table 1 describes the soft key editing functions on the IP Phone 2002.

Connect the IP Phone 2002 components

Before you begin

**CAUTION**

**Damage to Equipment**

Do not plug the IP Phone 2002 into a regular telephone jack. This results in severe damage to the IP Phone. Consult your system administrator to ensure that you plug your set into a 10/100BaseT Ethernet jack.

**Steps**

1. Connect one end of the handset cord to the handset jack (identified with a handset icon) on the back of the telephone. Connect the other end to the jack on the handset.

2. Choose one of the following connections:
   
   a. *For a telephone not sharing LAN access with a PC*, connect one end of the CAT5 line cable to the LAN ethernet port located on the back of the telephone (identified with a LAN icon). Plug the other end of the CAT5 line cable into the IP network.
   
   b. *For a telephone sharing LAN access with a PC*, connect one end of the CAT5 line cable to the LAN ethernet port located on the back of the telephone (identified with a LAN icon) and the other end to the IP network. Insert a second CAT5 line cable into the PC ethernet port located on the back of the telephone (identified with a PC icon) and the other end into the computer's Ethernet port.

3. Contact your installation technician for the proper power option. This telephone can be powered by an AC adapter or over a LAN.

4. Thread the cord around the strain relief, retaining hook, and channel provided for a secure power connection.
5. Secure the telephone footstand to the telephone base. Use the angle grip on the top back of the telephone to change position.

Figure 4 shows connections on the IP Phone 2002.

**Figure 4: IP Phone connections**
Configure options on the IP Phone 2002

The IP Phone 2002 Services menu lists the following submenus:

- The Telephone Option menu enables you or your system administrator to configure telephone preferences.
- The Password Admin menu enables you or your system administrator to change the Station Control Password.
- The Virtual Office Login and Test Local Mode (for branch office) menus are listed when an IP Phone 2002 Class of Service is set for Virtual Office and branch office. For more information, see page 119.

**Note:** The Password Admin, Virtual Office Login, and Test Local Mode menus may not be available on your IP Phone 2002. Consult your system administrator.

The Telephone Option menu offers the following options:

<table>
<thead>
<tr>
<th>Volume adjustment…</th>
<th>Display diagnostics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contrast adjustment</td>
<td>Local DialPad Tone</td>
</tr>
<tr>
<td>Language…</td>
<td>Ring type…</td>
</tr>
<tr>
<td>Date/Time format…</td>
<td>Change feature key label</td>
</tr>
<tr>
<td>OnHook Default path</td>
<td>Set Info</td>
</tr>
</tbody>
</table>

**Note:** When an option has a sublist, an ellipses (…) appears after the option.
Use the Telephone Option menu

To use the Telephone Option menu:

1. Press the Services key.

2. Press the Up/Down navigation keys to scroll and highlight Telephone Option.

3. Press the Select key.

4. Use the Up/Down navigation keys to scroll and highlight an option (for example, Language…).

5. Press the Select key. The display provides information required to adjust your selection.

6. Choose one of the following:
   — Press the Select key to save changes and return to the Telephone Option menu.
   — Press the Cancel key to keep existing settings.
Adjust volume

To adjust the volume, press the Services key and select Volume adjustment... from the Telephone Option menu. Choose one of the following:

- Ringer
- Handset
- Handsfree
- Buzzer

To adjust Ringer volume:

1. Press the Up/Down navigation keys to scroll and highlight Ringer.

2. Press the Select key.

3. To increase or decrease the volume, do one of the following:
   - Press the Lower/Higher soft keys.
   - Press the Up/Down navigation keys.
4. Choose one of the following:

   - Press the **Select** key to save the volume level and return to the **Telephone Option** menu.
   - Press the **Cancel** key to keep existing settings.
To adjust Handset listen volume:

1. Press the Up/Down navigation keys to scroll and highlight `Handset listen`.

2. Press the Select key.

3. To increase or decrease the volume, do one of the following:
   - Press the Lower/Higher soft keys.
   - Press the Up/Down navigation keys.

4. Choose one of the following:
   - Press the Select key to save the volume level and return to the Telephone Option menu.
   - Press the Cancel key to keep existing settings.

To adjust the Handsfree listen volume:

1. Press the Up/Down navigation keys to scroll and highlight `Handsfree listen`.

2. Press the Select key.
3. To increase or decrease the volume, do one of the following:
   — Press the Lower/Higher soft keys.
   — Press the Up/Down navigation keys.

4. Choose one of the following:
   — Press the Select key to save the volume level and return to the Telephone Option menu.
   — Press the Cancel key to keep existing settings.
To adjust the Headset listen volume:

1. Press the Up/Down navigation keys to scroll and highlight Headset listen.

2. Press the Select key.

3. To increase or decrease the volume, do one of the following:
   — Press the Lower/Higher soft keys.
   — Press the Up/Down navigation keys.

4. Choose one of the following:
   — Press the Select key to save the volume level and return to the Telephone Option menu.
   — Press the Cancel key to keep existing settings.

To adjust the Buzzer volume:

1. Press the Up/Down navigation keys to scroll and highlight Buzzer.

2. Press the Select key.
3. To increase or decrease the volume, do one of the following:
   — Press the **Lower/Higher** soft keys.
   — Press the **Up/Down** navigation keys.

4. Choose one of the following:
   — Press the **Select** key to save the volume level and return to the **Telephone Option** menu.
   — Press the **Cancel** key to keep existing settings.
Adjust display screen contrast

To adjust the LCD display screen contrast, press the Services key and select Contrast adjustment from the Telephone Option menu.

*Note:* If you have a Nortel Networks IP Phone KEM attached to your telephone, adjusting the telephone’s LCD screen contrast also adjusts the display screen contrast setting for the IP Phone KEM.

To adjust display screen contrast:

1. To increase or decrease the display contrast level, choose one of the following:
   - Press the Lower/Higher soft keys.
   - Press the Up/Down navigation keys.

2. Choose one of the following:
   - Press the Select key to save the contrast level and return to the Telephone Option menu.
   - Press the Cancel key to keep existing settings.
Select a language

The display is available in multiple languages. To choose a language, press the Services key and select Language… from the Telephone Option menu.

To select a language:

1. Press the Up/Down navigation keys to scroll and highlight the desired language (for example, German [Deutsche]).

2. Choose one of the following:
   — Press the Select key to save the language and return to the Telephone Option menu.
   — Press the Cancel key to keep existing settings.
Select Date/Time format

Several Date/Time formats are available. Formats are based on the 12-hour and 24-hour clocks. To select a date/time format, press the Services key and select Date/Time… from the Telephone Option menu.

To select date and time format:

1. Press the Up/Down navigation keys to scroll and highlight the desired format. Sample formats appear on the upper-right side of the display area.

2. Choose one of the following:
   - Press the Select key to save the format and return to the Telephone Option menu.
   - Press the Cancel key to keep existing settings.
Display diagnostics

The Display diagnostics option tests the telephone’s display screen and indicator lights. To access display diagnostics, press the Services key and select Display Diagnostics from the Telephone Option menu.

To select Display diagnostics:

1. Press the Up/Down navigation keys to scroll through the list to view display capabilities.

2. Press the Cancel key to return to the Telephone Option menu.
Choose Local DialPad Tone

The Local DialPad Tone option produces Dual-Tone Multi-Frequency (DTMF) sounds, a single tone, or no sound when you press a key on the dialpad. To choose a local dialpad tone, press the Services key and select Local DialPad Tone from the Telephone Option menu.

To choose a Local DialPad Tone:

1. Press the Up/Down navigation keys to highlight one of the following dialpad tones:
   - None to disable all tones.
   - Short Click to enable a single tone for all keys.
   - DTMF to turn on a separate DTMF tone for each key.

2. Choose one of the following:
   - Press the Select key to save the tone selection and return to the Telephone Option menu.
   - Press the Cancel key to keep existing settings.
Choose Ring type

The Ring type... option sets the telephone’s ring tone. To choose a ring type, press the Services key and select Ring type... from the Telephone Option menu.

To choose a ring type:

1. Press the Up/Down navigation keys to scroll and highlight one of the ring types.

2. Press the Play key to sample the ring tone.

3. Choose one of the following:
   — Press the Select key to save the ring type and return to the Telephone Option menu.
   — Press the Stop key and use the Up/Down navigation keys to select a different ring type.
   — Press the Cancel key to keep existing settings.
Enable Call Timer

The call timer measures how long you are on each call. To enable call timer, press the Services key and select Call Timer from the Telephone Option menu.

To enable Call Timer:

1. Choose one of the following:
   — To turn on the Call timer, press the On key.
   — To turn off the Call timer, press the Off key.

2. Choose one of the following:
   — Press the Select key to save the setting and return to the Telephone Option menu.
   — Press the Cancel key to keep existing settings.
Enable OnHook Default Path

The OnHook Default Path option allows you to use a headset or the Handsfree feature to operate your IP Phone while it is on-hook. To enable OnHook Default Path, press the Services key and select OnHook Default Path from the Telephone Option menu.

To enable Onhook Default Path:

1. Press the Up/Down navigation keys to highlight one of the following:
   - Handsfree enable
   - Headset enable

2. Choose one of the following:
   - Press the Select key to save the default path and return to the Telephone Option menu.
   - Press the Cancel key to keep existing settings.
Configure options on the IP Phone 2002

Change feature key labels

The Change feature key label option renames the label displayed next to each feature key or restores the default labels to the keys. To rename feature key labels, press the Services key and select Change feature key labels from the Telephone Option menu.

**Note:** If a feature key is configured as an autodial key, the label does not change if the autodial key configuration changes.

To rename the labels:

1. Press the **Select** key.

2. Press the feature key that is being changed.

   **Note:** If you enter a prime DN key, an error message displays.

3. Enter the new information for the feature key label. To enter special characters, press the Up navigation key. For information about entering text, refer to “Enter text using the dialpad” on page 22.

4. Choose one of the following:
   - Press the **Select** key to save the changes and return to the Telephone Option menu.
   - Press the **Cancel** key to keep existing settings.
Configure options on the IP Phone 2002

Restore the default labels
To restore default labels, press the Services key and select Change feature key labels from the Telephone Option menu.

1. Press the Select key.

2. Use the Up/Down navigation keys to scroll and highlight one of the following:
   a. Restore all key labels
      — Press Yes to change all feature keys to default values.
   b. Restore one key label
      — Press the Select key.
      — Press the feature key.
      — Press Yes to change the selected feature key label to the default value.

Note: When labels are changed to default values, you cannot undo the change. The label settings must be re-entered.
**View set information**

The set information option displays the following set-specific information:

- IP Address
- Hardware ID of the IP Phone
- Current firmware version

To view set information, press the **Services** key and select **Set Info** from the **Telephone Option** menu.

To view set information:

1. Press the **Up/Down** navigation keys to scroll through the list to view the set information.
2. Press the **Cancel** key to return to the **Telephone Option** menu.

**Configure call log options**

Use the call log option to configure the following preferences:

- Callers List log
- New call indication
- Preferred Name Match
- Area code set-up
Configure the Callers List log

You can configure the Callers List to log all incoming calls or only unanswered calls. The default setting is “Log all calls”. To log unanswered calls only, press the Services key and select Call Log Option from the Telephone Option menu.

To log only unanswered calls:

1. Press the Up/Down navigation keys to scroll and highlight the Log Mode option.
2. Press the Select key.
3. Press the Up/Down navigation keys to scroll and highlight Log unanswered calls.
4. Choose one of the following:
   — Press the Select key to save the setting.
   — Press the Cancel key to keep existing settings.
Configure New Call indication

You can configure the IP Phone 2002 to display a message to indicate a new incoming call was received. The default setting is “On”. To configure new call indication, press the Services key and select Call Log Option from the Telephone Option menu.

To configure New Call indication:

1. Press the Select key to select Incoming Calls.
2. Press the Select key.
3. Press the Up/Down navigation keys to scroll and highlight New Call Indication.
4. Press the Select soft key.
5. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — New call indication off
   — New call indication on
Configure options on the IP Phone 2002

Configure Preferred Name Match

You can configure the IP Phone 2002 to display the name of the caller as defined in your Personal Directory. The default setting is “Off”. To configure Preferred Name Match, press the Services key and select Call Log Option from the Telephone Option menu.

To configure Preferred Name Match:

6. Choose one of the following:
   — Press the Select soft key to save the setting.
   — Press the Cancel key to keep existing settings.

Configure Preferred Name Match

You can configure the IP Phone 2002 to display the name of the caller as defined in your Personal Directory. The default setting is “Off”. To configure Preferred Name Match, press the Services key and select Call Log Option from the Telephone Option menu.

To configure Preferred Name Match:

1. Press the Up/Down navigation keys to scroll and highlight Preferred Name Match.

2. Press the Select soft key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — Preferred name match on
   — Preferred name match off

4. Choose one of the following:
   — Press the Select soft key to save the setting.
   — Press the Cancel key to keep existing settings.
Configure Area Code set-up

The Area Code set-up menu enables a user to save up to 3 area codes. When an incoming call arrives with an area code that matches one of the 3 stored area codes, the incoming call number is re-ordered to display the telephone number followed by the area code (as opposed to the area code followed by the telephone number). This re-ordering is also performed when a user scrolls through their Callers List. To configure the area code, press the **Services** key and select **Call Log Option** from the **Telephone Option** menu.

**To configure default area codes (3 maximum):**

1. Press the **Up/Down** navigation keys to scroll and highlight **Area Code Setup**.
2. Press the **Select** key.
3. Press the **Up/Down** navigation keys to scroll and highlight one of the following:
   - Area Code # 1
   - Area Code # 2
   - Area Code # 3
4. Press the **Select** key.
5. Use the dialpad to enter the number at the prompt.
Configure options on the IP Phone 2002

To edit area code display:

6. Choose one of the following:
   — Press the Select soft key to save the setting.
   — Press the Cancel key to keep the existing settings.

1. Press the Up/Down navigation keys to scroll and highlight Area Code Setup.

2. Press the Select soft key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — Area Code # 1
   — Area Code # 2
   — Area Code # 3

4. Press the Select soft key.

5. Use the dialpad to edit the number.
Configure Name Display format

You can configure the IP Phone 2002 to display the name of the incoming calling party in the following formats:

- first name/last name
- last name/first name

To configure name display format, press the Services key and select Call Log Option from the Telephone Option menu.

To configure name display format:

1. Press the Up/Down navigation keys to scroll and highlight Name display format.
2. Press the Select soft key.
3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - first name, last name
   - last name, first name

6. Choose one of the following:
   - Press the Select soft key to save the setting.
   - Press the Cancel key to keep existing settings.
4. Choose one of the following:
   — Press the **Select** soft key to save the setting.
   — Press the **Cancel** key to keep existing settings.
Make a call

This section describes features associated with making a call. There are several ways to make a call from an IP Phone 2002.

**Use Off-hook dialing**

1. Lift the handset.

2. Dial the number.

3. To terminate the call, choose one of the following:
   - Replace the handset into the cradle.
   - Press the **Goodbye** key.

**Use On-hook dialing**

1. Leave the handset in the cradle.

2. Press the line (DN) key.
Make a call

1. Press the Handsfree key.

2. If a headset is connected, press the Headset key.

3. Dial the number.

4. When the called party answers, lift the handset.

5. To terminate the call, choose one of the following:
   — Replace the handset into the cradle.
   — Press the Goodbye key.

Use Handsfree dialing

Use Handsfree dialing to use a built-in microphone and speaker, or a headset, instead of the handset. While on an active call, you can switch between Handset and Handsfree mode.

3. Dial the number when the dial tone sounds.

(Goodbye)
To discontinue a handsfree call:

Press the **Goodbye** key.

(Goodbye)

To mute a handsfree call:

1. Press the **Mute** key. The LED indicator flashes.

(Mute)

2. Press the **Mute** key again to return to a two-way handsfree conversation.

(Mute)

To switch from Handsfree to Handset mode:

Lift the handset.

To switch from Handset mode to Handsfree mode:

1. Press the **Handsfree** key.

2. Replace the handset.
To use a headset:

1. Connect the **headset** to the headset jack or the handset jack.

2. Press the **Headset** key.

To switch from Handsfree to headset:

3. Press the **Headset** key.

**Use the Directory applications**

You can make calls using various Directory applications available on your IP Phone 2002. The applications include:

- Corporate Directory
- Personal Directory
- Callers List
- Redial List
**Make a call using Corporate Directory**

The Corporate Directory feature provides an alphabetical list of entries using last names. You can search by name, view additional information on each entry, and dial Corporate Directory numbers. To use Corporate Directory, press the Directory key and select Corporate Directory.

To search for a specific number:

1. When prompted, use the dial pad to enter the desired name in the lastname/firstname format.

2. Press the Search key to find the desired name.
   
   **Note:** A successful search displays the first match on the screen.

3. Choose one of the following:
   
   — Press the Dial key to dial the resulting number.
   
   — If there is no match to the search query, start a new search or change the information in the initial search.
   
   — Press the Cancel key to exit without dialing.

To scroll to a specific number:

1. Press the Up/Down navigation keys to scroll and highlight a name in Corporate Directory.
2. Choose one of the following:

- Press the **Dial** key to dial the resulting number.
- Press the **Cancel** key to exit without dialing.

**Make a call using Personal Directory**

The Personal Directory feature allows you to store a maximum of 100 entries consisting of names and numbers. To use Personal Directory, press the **Directory** key and select **Personal Directory**. For information on how to configure and use Personal Directory, refer to “Personal Directory” on page 111.

**To use Personal Directory:**

1. Press the **Up/Down** navigation keys to scroll and highlight a name in the **Personal Directory**.

2. Choose one of the following:

- Press the **Dial** key to dial the resulting number.
- Press the **Cancel** key to exit without dialing.
Make a call using Callers List

The Callers List feature automatically stores up to a maximum of 100 callers. After 100 callers have been stored, each additional caller overwrites the oldest entry. To use Callers List, press the Directory key and select Callers List. For information on how to configure and use Callers List refer to “Callers List” on page 114.

To use the Callers List:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Callers List.

2. Choose one of the following:
   - Press the Dial key to dial the resulting number.
   - Press the Cancel key to exit without dialing.
Make a call using Redial List

The Redial List feature automatically stores a maximum of 20 previously dialed telephone numbers. To use Redial List, press the Directory and select Redial List. For information on how to configure and use Redial List, refer to “Redial List” on page 117.

To use Redial List:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Redial List.

2. Choose one of the following:
   - Press the Dial key to dial the resulting number.
   - Press the Cancel key to exit without dialing.

Use Predial

Use the Predial feature to enter, preview, and edit numbers before dialing.

To use Predial:

1. Without selecting the line key, enter the number to be dialed.

2. Press a line key to dial the number.
3. Lift the handset when the called party answers or, if in Handsfree mode, begin to speak.

To edit a Predial number:

1. Use the dialpad to enter the number.

2. Choose one of the following:
   — To erase all numbers, press the Clear key. Re-enter the numbers to be dialed.
   — To change numbers one-at-a-time, press the Delete key to backspace. Re-enter the number.

3. Press a line key to dial the number.

Use AutoDial

Use the AutoDial feature to display, store, and automatically dial telephone numbers.
To store an AutoDial number:

1. Without lifting the handset, press the appropriate AutoDial key.
   
   **Note:** The display screen displays the word “Autodial” next to the appropriate key.

2. Using the dial pad, dial the telephone number (including access code) to be stored on the selected AutoDial key.

3. Press the AutoDial key a second time to store the number on the selected key.
   
   **Note:** Once a number has been stored, the word “Autodial” disappears, and the stored number displays.

4. Assign a label to the key.
   
   **Note:** After assigning the label, the number disappears and only the label appears on the screen next to the key.

To display an AutoDial number:

1. Press the Display key.

2. Press an AutoDial key in the upper display area to display the number associated with that key.
To use AutoDial:

1. Lift the handset.

2. Press an AutoDial key in the upper display area to dial the number associated with that key.
Activate Ring Again

Use the Ring Again feature if you receive a busy tone or if there is no answer. Your IP Phone rings when the person you called becomes available. Ring Again automatically redials the number.

To activate Ring Again:

1. Dial a number and receive a busy tone or no answer.

2. Choose one of the following:
   — Press the Ring Again key.
   — Enter the RingAgain Activate FFC.

To call a Ring Again party when you receive notification:

1. After receiving the notification ring, lift the handset, or if you are using the headset, go to Step 2.

2. Press the Ring Again key to automatically dial the number.
To deactivate Ring Again before notification:

Choose one of the following:

- Press the **RingAgain** key a second time.
- Press the **RingAgain Deactivate** FFC.

---

**Redial the last number called**

Use the Last Number Redial feature to automatically redial the last dialed number.

**To use Last Number Redial:**

Choose one of the following:

1. To redial using the handset:
   
   a. Lift the handset.

   b. Press the line (DN) key.

2. To redial without lifting the handset, press the line (DN) key twice (the last number dialed is automatically redialed).
Use Speed Call

Use the Speed Call feature to place internal and external calls by dialing a one-, two-, or three-digit code to store, edit, and automatically dial frequently called telephone numbers.

To store a Speed Call number:

1. Press the Speed Call Controller key. The triangular icon flashes, indicating programming mode.

2. At the prompt:
   - Enter a one-, two-, or three-digit code (0-999).
   - If required, dial the access code.

3. Press the Speed Call Controller key again to save the code and number. The flashing icon turns off.

To make a Speed Call:

1. Lift the handset.

2. Press the Speed Call Controller key.

3. Dial the Speed Call code to automatically dial the number.
Make a call

Make a System Speed Call

Use the System Speed Call feature to dial Speed Call codes that override dialing restrictions placed on your telephone.

To make a System Speed Call:

1. Lift the handset.

2. Choose one of the following:
   - Press the System Speed Call key.
   - Press the System Speed Call Controller (SScCtl) key.

3. Dial the Speed Call code to automatically dial the number.

Make a call using Hot Line

Use the Hot Line feature to automatically dial a specific number.

To use Hot Line:

Press Hot Line to automatically dial the number.
**Make an Intercom call**

Use the Intercom feature to call a member of your intercom group by pressing the code assigned to each member.

**To make an Intercom call:**

1. Lift the handset.

2. Press the **Intercom** key.

3. Dial the one- or two-digit code for the desired intercom group member.

**To answer an Intercom call while on a line other than your Intercom group line:**

1. Choose one of the following keys:
   - Press the **Hold** key to put the current call on hold.
   - Press the **Goodbye** key to end the call.

2. Press the **Intercom** key and begin to speak.
Answer a call

Each incoming call causes the telephone to ring, the LCD indicator 📷 to flash, and the Message Indicator lamp to flash.

To answer a call:

Choose one of the following:

- Lift the handset.
- Press the Handsfree button located on the left side of the handset.
- Press the line (DN) key beside the LCD indicator as it flashes.
- Press the Headset key if a headset is connected to your telephone.
While on an active call

This section describes features available during an active call.

Place a call on hold

Use the Hold feature when talking on one line and another call arrives on a second line. Retain the original call by putting it on hold and then answer the second call.

To place a call on hold:

Press the Hold key. The LCD indicator flashes beside the line on hold.

Note: If Automatic Hold is enabled, the active call is automatically put on hold when you answer the second call.

To retrieve a call on hold:

Press the line (DN) key beside the flashing LCD indicator.
Transfer a call

Use the Transfer feature to redirect a call to the appropriate person.

To use the Transfer feature to direct a call to a third party:

1. Press the Transfer key. The other party is on hold and a dial tone sounds. The LCD indicator light flashes steadily.

2. Dial the DN to which the call is to be transferred or use Personal Directory, Redial List, or Callers List to select a number to dial.

3. When that number rings or a person answers, press the Transfer key to connect the calling party.

To return to the original call, if the transfer is incomplete:

If the person called is not available, press the line (DN) key (next to the LCD indicator) to reconnect to the original call.
Use Timed Reminder Recall

Use the Timed Reminder Recall feature to receive a reminder tone when a transferred call is not answered.

To use Timed Reminder Recall:

1. Press the Transfer key. The call is put on hold.

2. Dial the number to which the call is being transferred.

3. Choose one of the following to start the recall timer:
   — Press the Transfer key.
   — Replace the handset before the extension answers.

Note: If the transfer is complete, the recall timer stops.
While on an active call

If the transferred call is not answered, your telephone rings:

1. Lift the handset to reconnect to the original caller.

2. Choose one of the following:
   - Press the Transfer key and repeat the transfer.
   - If the transfer is picked up while you are on the line, press the Goodbye key to complete the transfer.

Use Attendant Recall

Use the Attendant Recall feature to contact an attendant during a call and to connect the call to the attendant.

To contact the attendant while on a call:

1. Press the Attendant Recall key and stay on the line until the attendant answers.

2. Press the Goodbye key. The caller remains connected to the attendant.
Use Call Park

Use the Call Park feature to hold temporarily (park) and retrieve a call from any telephone. Using Call Park does not tie up a line. When configured network-wide, Call Park can be used across networks. A System Park Extension can be set to automatically park most calls.

To park a call on the System Park DN or your own DN:

During an active call, press the Park key twice.

Note: By default, the call is parked on your DN unless a System Park is enabled to automatically park calls on the system.

To park a call on a DN other than the System Park DN or your own DN:

1. Press the Park key.
2. Dial the DN where you want to park the call.
3. Press the Park key.
While on an active call

To park a call using the SPRE code or FFC:

1. Choose one of the following.
   — Press the Transfer key.
   — Press the Conference key.

2. Dial the Call Park FFC.

3. To use an alternate DN from the System Park DN or your own DN, dial the DN where you want to park the call. Otherwise, proceed to Step 4.

4. Choose one of the following.
   — Press the Transfer key.
   — Press the Conference key.

To retrieve a parked call:

1. Lift the handset.

2. Press the Park key.
3. Dial the DN where you parked the call.

Note: If a parked call is not retrieved within a specified period of time, it rings back to your telephone or to the attendant.

Record a Calling Party Number

Use the Calling Party Number feature to record a caller’s number, or to charge a call to an account number, during an established call.

To record a caller’s number for accounting purposes:

1. Press the Call Party key. The caller is placed on hold.

2. Dial a charge account number or the caller’s number.

Note: For information on using the Charge key, see “Charge a call or charge a forced call” on page 100.

3. Press the Call Party key to return to the call.
While on an active call

Display incoming calls

Use the Display feature to display a second incoming caller’s number and name (if available) during an active call, without interfering with the call in progress.

To view the information on an incoming call while on a call in progress:

1. Press the **Display** key.

2. Press the flashing line (DN) key. The call waiting information displays.

   **Note:** When used with other feature keys, the **Display** key displays information associated with those feature keys.

Trace a Malicious call

Use the Malicious Call Trace feature to trace nuisance calls within your system.

**Note:** This is not a default feature. Contact your system administrator to configure this feature on your telephone.

To use Call Trace while on a call:

Press the **Call Trace** key.
To use Call Trace without a Call Trace key:

1. Choose one of the following:
   — Press the Transfer key.
   — Press the Conference key.

2. Dial the SPRE code followed by 83 or dial the Call Trace FFC to automatically reconnect.
Incoming calls

This section describes features that are used with incoming calls.

**Activate Automatic Answerback**

When the Automatic Answerback feature is active, your set automatically answers in Handsfree mode after one ring; however, calls are *not* forwarded to the voice message service.

**To activate Automatic Answerback:**

Press the **Automatic Answerback** key.

**To deactivate Automatic Answerback:**

Press the **Automatic Answerback** key again.

**Activate Call Pickup**

Use the Call Pickup feature to pick up calls from any telephone in the same pickup group or another pickup group.

**To answer a call in your own call pickup group:**

1. Lift the handset.
To answer an incoming call in another call pickup group:

1. Lift the handset.
2. Press the Group Pickup key or enter the Pickup Group FFC.
3. Dial the pickup group number of the ringing telephone.

To answer a call at a specific extension in any pickup group:

1. Lift the handset.
2. Choose one of the following:
   — Press the Pickup key.
   — Enter the Pickup Directory Number FFC.
3. Dial the DN of the telephone that is ringing (in your call pickup group). If the pickup DN or group number is invalid (an overflow burst tone sounds and the screen displays *Goodbye and try again*), press the **Goodbye** key.
Use Call Waiting

The Call Waiting feature alerts you to an incoming call by producing a tone. It also puts the current call on hold while you answer the new call.

**To answer an incoming call while on another call:**

1. When the incoming call tone sounds, press the **Hold** key to put the current call on hold.

   *Note:* If **Automatic Hold** is enabled, it is not necessary to press the **Hold** key.

2. Press the **Call Waiting** key.

**To return to the first telephone call:**

1. Choose one of the following:
   - Press the **Hold** key to put the second call on hold.
   - Press the **Goodbye** key to end the second call.

2. Press the line (DN) key associated with the first call.
If you do not have a Call Waiting key:

1. Press the **Goodbye** key to end the current call.

2. Press the line (DN) key beside the flashing status icon to answer the incoming call.
While away from your desk

This section describes features to use when you are away from your desk.

Use Call Forward

Use the Call Forward feature to direct incoming calls to ring on another line (DN). If the telephone is ringing, the call cannot be forwarded.

To forward your calls or change the forward number:

1. Choose one of the following:
   — Press the Forward key.
   — Lift the handset and enter the Call Forward All Calls Activate FFC.

2. Dial the DN where you want to forward your calls.

3. Press the Forward key.

To deactivate Call Forward:

Choose one of the following:

• Press the Forward key.
• Lift the handset and enter the Call Forward All Calls Deactivate FFC.
To reinstate Call Forward to the same number:

Press the Forward key twice.

Use Internal Call Forward

Use Internal Call Forward to accept only calls originating at internal DNs to ring at another DN. Calls originating outside your telephone system still ring at your telephone. Current incoming calls cannot be forwarded.

To forward internal calls:

1. Choose one of the following:
   - Press the Internal Call Forward key.
   - Lift the handset and enter the Internal Call Forward Activate FFC.

2. Dial the DN to which your internal calls will be forwarded.

3. Press the Internal Call Forward key.
To deactivate Internal Call Forward:

Choose one of the following:

- Press the **Internal Call Forward** key.
- Lift the handset and enter the **Internal Call Forward Deactivate** FFC.

To reinstate Call Forward to the same number:

**IntForward**

Press the **Internal Call Forward** key twice.

---

**Use Remote Call Forward**

Use the Remote Call Forward feature to forward calls (from any telephone other than your own) to any telephone.

To activate Remote Call Forward:

1. Lift the handset.
2. If calling from a telephone outside the system, dial your direct system access number and wait for dial tone.
3. Dial the **Remote Call Forward Activate** FFC to activate the feature.
4. Dial your **Station Control Password**. A dial tone sounds.
While away from your desk

5. Choose one of the following:
   — Dial your DN.
   — To forward calls to the previous call forward telephone number, press the # key. (Do not perform steps 6 and 7).

6. Dial the number to which calls are being forwarded. If calls are forwarded to an invalid number, a fast busy signal sounds.

7. Press the # key.

To deactivate Remote Call Forward:

1. Lift the handset.

2. If calling from a telephone outside the system, dial the direct system access number and wait for the dial tone.

3. Dial the Remote Call Forward Deactivate FFC.

4. Dial your Station Control Password.
While away from your desk

Secure your telephone

Use the Electronic Lock feature to prevent others from making calls from your telephone. The Electronic Lock feature is controlled using your Station Control Password (SCPW). To change your Station Control Password, please refer to “Security features” on page 19.

To lock your telephone:

5. After hearing the dial tone, dial your DN.

6. Press the # key.

1. Lift the handset.

2. Dial the Electronic Lock Activate FFC.

3. Dial your Station Control Password.

4. Choose one of the following:
   — If dialing locally, press the Goodbye key.
   — If dialing the FFC remotely, dial your DN.
To unlock your telephone:

1. Lift the handset.

2. Dial the **Electronic Lock Deactivate FFC**.

3. Dial your **Station Control Password**.

4. Choose one of the following:
   - If dialing locally, press the **Goodbye** key.
   - If dialing the FFC remotely, dial your DN.
Talk with more than one person

This section describes features that enable conversations between more than two people.

Use the Call Join feature

Use the Call Join feature to connect a call to a current active call. This creates a conference between the two callers and yourself.

To connect a call on hold (on a different line) to your current call:

1. Press the Conference key.

2. Press the line key that has the number of the caller you want to connect to your current call.

3. Press the Conference key to join the person on hold to your conversation.
Set up a Conference call

Use the Conference feature to set up a conference call for three or six people including yourself. The number of people the conference feature supports depends on your telephone's configuration.

To set up a conference call:

1. While on a call, press the Conference key to place the party on hold. You receive a dial tone.

2. Dial the number of the person you want to add to the conference call. You can talk privately to the person you are adding at this time.

   **Note:** If you press the Directory key, you can also use Corporate Directory, Personal Directory, Redial List, and Callers List to find and dial the number of the person you want to add to the conference call.

3. Press the Conference key a second time to conference all parties together.

If the person you attempt to add to the conference is unavailable:

1. Press the Goodbye key.
2. Press the line (DN) key beside the flashing status icon to return to your original call.
Use the Conferee Selectable Display and Disconnect feature

Use the Conferee Selectable Display and Disconnect feature to list active conferees and disconnect a conferee from the conference call.

To view active conferees:

1. While on a conference call, press the Conferee Selectable Display key to turn on the LCD indicator. Each key press changes the screen to show a different active conferee.

   Note: This action has no effect on the display of other telephones involved in the conference.

2. Press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.

To disconnect a conferee:

1. While on a conference call, press the Conferee Selectable Display key until the conferee you want to disconnect appears on the screen.

2. Press the line (DN) key on which the conference call is established.
Talk with more than one person

3. Choose one of the following:
   — For a single conferee, press the **Goodbye** key. If configured, the **Conference Count Display** returns an updated total count of conferees. The LCD indicator turns off.
   — For multiple conferees, repeat steps 1 and 2 until all conferees are disconnected. Then press the **Goodbye** key.

**Use Group Call**

Use the Group Call feature to automatically call members of a predefined group, one at a time, until they all answer.

**To call group members:**

1. Lift the handset.
Talk with more than one person

2. Press the **Group Call** key or enter the **Group Call FFC**.

   — The feature automatically calls all group members. The icon flashes until all members answer.

   — The telephone numbers of the group members appear on the display as they answer. When the last person answers, the **Group Call** indicator lights steadily.

   — When a person in your group is on a conference call or another group call, they are not connected to your group call.

   — After everyone in the group has answered, only the person who made the group call can put the call on hold.

**To answer a Group Call:**

1. Lift the handset. Note the following about Notification Tones:

   — If you are on a call and receive three 10-second tones, this is the notification of a group call on your current extension.

   — If you are on a call on another line when a group call is made, you receive a long tone through the handset or speaker.

   — If you are already on a conference call or another group call, you do not receive notification of a group call.
To end a Group Call:

Press the **Goodbye** key.

**Note:** When the person who made the group call disconnects, the call terminates for all members of the group. However, the members of the group call can disconnect from the call and not affect other members on the call.
Work without interruption

This section describes a feature that provides uninterrupted work time.

**Activate Make Set Busy**

Use the Make Set Busy feature to make your telephone appear busy to all callers.

**To activate Make Set Busy:**

Choose one of the following:

- Press the Make Set Busy key.
- Lift the handset and enter the Make Set Busy Activate FFC.

**To deactivate Make Set Busy:**

Choose one of the following:

- Press the Make Set Busy key a second time to deactivate the feature.
- Lift the handset and enter the Make Set Busy Deactivate FFC.
Additional call features

Contact your system administrator to determine if the following call features are available on your telephone.

Use AutoDial Transfer

Use the AutoDial Transfer feature to transmit digits through your AutoDial key to the Central Office after a Trunk Switchhook Flash. You must be on a Central Office/Exchange (CO) trunk call from or to a Central Office (CO) that offers Centrex or exchange line-type features.

To use AutoDial Transfer when picking up an incoming trunk call:

1. Press the **Centrex Switchhook Line Flash** key and wait for interrupted dial tone.

2. Press the **AutoDial** key to call the number desired.

3. Press the **Goodbye** key to end the call.
Use the Buzz feature

Use the Buzz feature to notify another person of a call, a visitor, or a request. Two telephones that are linked together enable one person to signal the other. The person signaled hears a buzz.

To buzz the telephone linked to your telephone:

Press the **Buzz** key. The telephone linked to your telephone buzzes as long as you press the key.
Use Call Page Connect to make an announcement

Use the Call Page Connect feature to make an announcement over a paging system.

**Note:** A Page key on an attendant console overrides and disconnects the telephones. The telephones must re-access the page trunk.

To connect to Call Page:

1. Lift the handset.

2. Dial the Page Trunk Access Code to complete the connection to the page system.

3. Make your announcement.

4. Press the Goodbye key.
Use Centrex/Exchange Line Switchhook Flash

Use the Centrex/Exchange Line Switchhook Flash feature during an established call to use a Centrex service, such as Call Transfer or Three-Way Calling.

To use Centrex/Exchange Line Switchhook Flash:

1. While on a call, press the Centrex Line Switchhook Flash key. A special dial tone sounds.

2. Dial the codes for your custom Centrex feature.

3. Press the Goodbye key to end the call.

Charge a call or charge a forced call

Use the Call Charge feature to charge a call to a specific account. The Forced Charge feature charges long-distance calls from a telephone restricted to local calls.

To charge a local or long-distance call to an account before you dial:

1. Lift the handset.
Additional call features

To charge a call in progress:

1. Choose one of the following:
   — Press the Transfer key.
   — Press the Conference key.

2. Choose one of the following:
   — Press the Charge key.
   — Dial the Call Detail Recording FFC.

3. Dial the charge account number.

4. Press the line (DN) key to return to the call.
To charge a call to an account when you transfer a call:

1. Press the **Transfer** key. The call is on hold.

2. Choose one of the following:
   — Press the **Charge** key.
   — Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. After the dial tone, dial the number to where the call is to be transferred.

5. Press the **Transfer** key when you hear the telephone ring.

**Note:** You can talk privately to the person at the transfer number before you press the Transfer key.
To charge a call to an account when you add someone to a conference call:

1. Press the **Conference** key. The call is placed on hold.

2. Choose one of the following:
   - Press the **Charge** key.
   - Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Dial the number of the person you want to add to the conference.

5. Press the **Conference** key.
Use Enhanced Override

Use the Enhanced Override feature to override an active call after you attempt a Forced Camp-on. Use Enhanced Override to make a simple call or a consultation call, such as placing a call on hold and calling another party.

To use Enhanced Override:

You receive a busy signal after dialing a telephone number.

1. Choose one of the following:
   - Press the Override key.
   - Enter the Override FFC to initiate a Forced Camp-on.

   If either person on the call disconnects at this time, you receive an overflow (fast busy/engaged) signal.

2. Choose one of the following:
   - Press the Override key again.
   - Enter the Override FFC again.

   The other two persons on the call receive an override tone and a conference call is established between the three of you. If anyone disconnects, the other two persons remain connected.

3. To terminate the call, press the Goodbye key.
Use Forced Camp-on feature

Use the Forced Camp-on feature to automatically ring another telephone (internal or external) immediately after that telephone disconnects from its current call.

To use Forced Camp-on:

You receive a busy signal after dialing a telephone number.

1. Choose one of the following:
   - Press the Override key.
   - Enter the Override FFC, to initiate a Forced Camp-on.

   **Note:** The person you called receives a tone, and you receive a ring/ringback signal or a busy/engaged signal, depending on the options chosen. You are now camped-on to the number you dialed.

2. Hang-up the telephone.

3. When the person you called finishes their call, your telephone automatically dials the number and both telephones ring.

Answering a call camped-on to your extension:

When your telephone rings, lift the handset.

   **Note:** You can program your telephone for either Camp-on or Call Waiting, but not both.
Override a busy signal

Use the Override feature to override a busy signal and interrupt another call.

To override a busy/engaged signal:

1. Dial a telephone number and receive a busy signal.

2. Choose one of the following:
   - Press the **Override** key.
   - Enter the **Override** FFC. The people in the targeted call receive a tone for approximately one second. After Override joins you to their call, a short tone repeats every 16 seconds.

3. To terminate the call, press the **Goodbye** key.
Use Privacy Release

Use the Privacy Release feature to enable one or more people who share your DN to join a call.

To use Privacy Release in an established state:

Press the Privacy Release key during a call. A person joins the call by pressing the shared number (DN) key on their telephone (Multiple Appearance DN feature).

Use Radio Page

Use an Radio Page feature to page a person and stay on the line until they answer. The paged person answers the call after entering a special Page Meet-me code from any telephone.

To use Automatic Preselection (Meet-me page):

1. Lift the handset.

2. Dial the Radio Paging Access FFC. The paging tone sounds (two beeps followed by a dial tone).

3. Dial the number of the party you want to page. After dialing, the ringback tone sounds.

Note: The paged person can use any telephone to enter a Radio Paging Answer FFC, plus their own DN number.
To use Automatic Post selection:

The called party is either busy on the telephone or away from their desk. To page the called party, there is no need to redial the number of the called party.

4. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds followed by silence, press the Goodbye key or replace the handset.

2. Dial the Radio Paging Access FFC. The ringback tone sounds.

   **Note:** The paged person can use any telephone to enter a Radio Paging Answer FFC, plus their own DN number.

3. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds followed by silence, press the Goodbye key or replace the handset.
To answer a Radio Page:
If you carry a Radio Pager, a page indicates that someone dialed your DN. If the Radio Page system is set up to function in Meet-me mode, you can answer the page call from any telephone.

1. Lift the handset.

2. Dial the Radio Paging Answer FFC. The paging tone sounds.

3. Dial your own DN to connect to the paging caller. If the caller has hung up, a steady high-pitched (Number Unavailable) tone sounds.

Use Voice Call

Use the Voice Call feature to page another person or make an announcement through someone else’s telephone speaker.

To make a voice call:

1. Lift the handset.

2. Press the Voice Call key and make the announcement.

3. Press the Goodbye key.
To respond to a voice call:

Your telephone rings once and the caller's voice transmits through your speaker. Lift the handset.
Additional features

Personal Directory

Use the Personal Directory feature to create and store up to 100 directory entries. A Personal Directory entry can contain:

- last name (up to 24 characters)
- first name (up to 24 characters)
- telephone numbers (up to 31 characters)

To use Personal Directory, press the Directory key and select Personal Directory.

*Note:* If password control has been enabled, enter your SCPW at the prompt.

To add an entry:

1. Press the AddNew soft key.
   
   *Note:* If the message “Directory is full” appears, one or more entries must be deleted to add a new entry.

2. Press the Next soft key.

3. Use the dial pad to enter the telephone number.
To edit an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Edit** soft key and perform your edits.

3. Choose one of the following:
   - Press the **Done** key to save the changes.
   - Press the **Cancel** key.

4. Press the **Next** soft key.

5. Use the dial pad to enter the name.

6. Choose one of the following:
   - Press the **Done** key to save the new entry.
   - Press the **Cancel** key to return to the Add screen.
To delete an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the entry.

2. Press the **Delete** soft key.

3. Choose one of the following:
   - Press the **Confirm** key.
   - Press the **Cancel** key.
To search for an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.

2. Choose one of the following:
   - Press the Dial key to dial the resulting number.
   - Press the Cancel key to exit without dialing.

**Callers List**

The Callers List feature logs all incoming calls. Callers List can store up to 100 entries in the list. When the list is full, the system over-writes the oldest entry. Use the Callers List feature to review missed calls and to dial calls. The Callers List contains:

- the caller’s last and first name (if available)
- the DN of the caller
- the time/date of the call
- the number of times the caller calls

Entries in the Callers List are sorted by the time the call was received.

*Note:* Calling Party Name Display (CPND) is affected depending on the preferred name match option. If preferred name match is on, the CPND appears according to your settings. If the preferred name match option is off, the CPND appears according to the system settings.

To access the Callers List, press the Directory key and select Callers List.

*Note:* If password control has been enabled, enter your SCPW at the prompt.
To dial an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.
2. Press the Dial key.

To delete an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.
2. Press the Delete key.
3. Choose one of the following:
   — Press the Confirm key.
   — Press the Cancel key.
To delete the entire Callers List:

1. Press the **Delete** key.

2. Choose one of the following:
   - **Yes** to delete entire Callers List.
   - **No** to return to the previous screen.
Redial List

The Redial List feature logs all outgoing calls. Redial List can store up to 20 entries in the list. When the list is full, the system over-writes the oldest entry. Use the Redial List feature to review calls made and to redial previously dialed calls. The Redial List contains:

- the last and first name of the dialed party (if available)
- the DN of the dialed party
- the time/date of the last dialed occurrence

Entries in the Redial List are sorted by the time the call was received.

**Note:** Calling Party Name Display (CPND) is affected depending on the preferred name match option. If preferred name match is on, the CPND appears according to your settings. If the preferred name match option is off, the CPND appears according to the system settings.

To access Redial List, press the Directory key and select Redial List.

**Note:** If password control has been enabled, enter your SCPW at the prompt.

**To dial an entry:**

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.

2. Press the Dial key.
**To delete an entry:**

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Delete** key.

3. Choose one of the following:
   - Press the **Confirm** key.
   - Press the **Cancel** key.

**To delete the entire Redial List:**

1. Press the **Delete** key.

2. Choose one of the following:
   - **Yes** to delete entire Callers List.
   - **No** to return to the previous screen.
Virtual Office

When you are away from your office telephone, use the Virtual Office feature to transfer calls, and all of your office telephone’s features, to a remote telephone.

**Note 1:** Consult your system administrator to verify if the Virtual Office feature is available for your use.

**Note 2:** When designated as the office telephone, the IP Phone 2002 can be activated for Virtual Office by an IP Phone 2004, an IP Softphone 2050, or another IP Phone 2002.

**Note 3:** When logged into an IP Phone 2004 or an IP Softphone 2050 using Virtual Office, feature keys 4, 5, and the Shift key are not available to the IP Phone 2002.

**Note 4:** A Virtual Office login from an IP Phone 2004 to an IP Phone 2002 or IP Softphone 2050 might be blocked in certain situations. Consult your system administrator.

Virtual Office login

To activate Virtual Office on your Office telephone from your Remote telephone:

1. Press the **Services** key.
2. Press the **Up/Down** navigation keys to scroll and highlight **Virtual Office Login**.
3. Press the **Select** key.
4. At the prompt, enter your User ID.

5. Press the Select key.

6. At the prompt, enter the home Station Control Password (SCPW).

**Note 1:** If the User ID is not found locally, the message “Locating Remote Server” displays.

**Note 2:** After three failed login attempts, wait one hour before attempting to log in again or contact your system administrator to reset your password. For more information, see “Security features” on page 19.

A successful login transfers all the features, time, date, and tones to your remote telephone from your office telephone.
Virtual Office on your Remote telephone

The following figures show various IP Phones logged on to an IP Phone 2002 using Virtual Office.

**Figure 5: Logged on to an IP Phone 2002**

![IP Phone 2002 logged on](image1)

**Figure 6: Logged on to an IP Phone 2002 using an IP Phone 2004**

![IP Phone 2004 logged on](image2)
Figure 7: Logged on to an IP Phone 2002 using an IP Softphone 2050.

![IP Phone and Softphone interfaces]

A User information line appears on all displays listing the number of your office telephone.

**Virtual Office on your Office telephone**

When activated for Virtual Office by a remote telephone, your office telephone is *logged out* and no longer operational.

A Logged Out message displays on your telephone alerting you that it is being used for Virtual Office.
To regain operation of a telephone being used for Virtual Office:

Choose one of the following:

1. To completely disconnect your office telephone from the remote telephone:
   a. Press the **Home** key.
   b. Enter your User ID and password (this logs the office telephone back on to your office network).

2. To use your office telephone as the remote telephone for Virtual Office, press the **Virtual** key to log in to another IP Phone.

**Virtual Office logout**

To log out from a remote telephone:

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight **Virtual Office Logout**.

3. Press the **Select** key.
**Troubleshoot Virtual Office**

When you use Virtual Office, error messages may display on-screen. Table 2 lists error messages and actions to correct the causes.

**Table 2: Troubleshoot Virtual Office (Part 1 of 3)**

| Displayed Message            | Probable Cause                                        | Actions                                                             |
|------------------------------|--------------------------------------------------------|                                                                    |
| Busy, try again              | Remote IP Phone is active (not idle).                  | Wait for remote IP Phone to become idle and try again.            |
|                              | ACD is logged in.                                      | Log out ACD IP Phone before Virtual Office from another IP Phone.  |
|                              | Make-Set-Busy is inactive on ACD IP Phone.             | Set Make-Set-Busy active on ACD IP Phone.                          |
| Invalid ID (1)               | Incorrect User ID entered.                             | Enter correct User ID.                                             |
|                              | User ID is not in Gatekeeper database.                 | Notify system administrator.                                       |
| Invalid ID (2)               | Incorrect User ID entered.                             | Enter correct User ID.                                             |
| Invalid ID (3)               | Incorrect User ID entered.                             | Enter correct User ID.                                             |
|                              | User ID in Gatekeeper database points to originating Call Server. | Notify system administrator.                                     |

**Media Gateway 1000B**

The Media Gateway 1000B (MG 1000B) telephone can operate in Normal or Local mode.

**Normal Mode**

The telephone registers with the Main Office and receives telephone services from the Main Office. At any time during Normal Mode, you can check local mode functionality (make and receive calls) by enabling Local Mode and returning to Normal Mode. After testing, you can return to Normal Mode by using the Resume Normal Mode command or by waiting for ten minutes.

**Local Mode**

If the WAN connection goes down, the IP Phone loses communication with the Main Office TPS. It then registers with the MG 1000B and receives telephone services from the MG 1000B. Features such as Personal Directory, Redial List, and Callers List are not available when operating in Local Mode. When in Local Mode, the telephone displays “LOCAL MODE”.
**Test Local Mode**

Use Test Local Mode to check local mode functionality (make and receive telephone calls). This is useful when provisioning has changed for an IP Phone on an MG 1000B Controller.

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight **Test Local Mode**.

3. Press the **Select** key (the telephone resets and registers to the branch office).

**Resume Normal Mode**

Use the Resume Normal Mode command to return to Normal Mode after testing survival functionality.

*Note:* If the Resume Normal Mode command is not performed after testing, the telephone automatically returns to Normal Mode in ten minutes.

1. Press the **Services** key.

2. Press the **Up/Down** navigation key to scroll and highlight **Resume Normal Mode**.
3. Press the Select key (the telephone registers back to the Main Office).

Troubleshoot MG 1000B

When using MG 1000B, error messages may display on your screen. Table 3 lists error messages and actions to correct the causes.

Hospitality features

Hospitality features are intended for hotel operations.

Set Automatic Wake-Up

Use the Automatic Wake-Up feature to receive a timed reminder call. From your telephone, you can program the system to automatically place a call to yourself at a predetermined time. When you answer the call, recorded music plays for up to 30 seconds, followed by a prerecorded announcement or the attendant.

To enter the time for an Automatic Wake-Up call:

1. Lift the handset.

2. Dial the Automatic Wake-Up Request FFC.

3. Dial the Automatic Wake-Up time in a 24-hour time format (hhmm). A tone sounds to confirm your entered time.

   **Note:** In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is entered as 2145.

4. Press the Goodbye key.
To quit an Automatic Wake-Up call:

1. Lift the handset.

2. Dial the **Automatic Wake-Up Quit** FFC.

3. Press the **Goodbye** key.

   *(Goodbye)*

To verify the time for the Automatic Wake-Up call:

1. Lift the handset.

2. Dial the **Automatic Wake-Up Verify** FFC.

3. Dial the **Automatic Wake-Up** time in a 24-hour time format (hhmm). If your query matches the preset time, a confirmation tone sounds.

   *(Goodbye)*

   **Note:** In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is 2145.

4. Press the **Goodbye** key.
Activate Message Registration

Use the Message Registration feature to read, change, or reset meters that log your hotel telephone calls.

To read meters:

1. Press the **Message Registration** key.
2. Dial the room DN.
3. Press the **Message Registration** key.

To change a meter:

1. Press the **Message Registration** key.
2. Dial the room DN.
3. Dial the correct meter count.
4. Press the * key.
To reset a meter to zero:

1. Press the Message Registration key.
2. Dial the room DN.
3. Press the * key.
4. Press the Message Registration key.
5. Press the Message Registration key.
Use Maid Identification

Use the Maid Identification feature to track the cleaning status of rooms. The maid enters the information from the telephone in each room.

To enter cleaning status:

1. Press the Room Status key.

2. Dial the DN for the room for which the cleaning status is being changed.

3. Dial one of the following cleaning status codes:
   - 1 = Cleaning requested
   - 2 = Cleaning in progress
   - 3 = Room cleaned
   - 4 = Room passed inspection
   - 5 = Room failed inspection
   - 6 = Cleaning skipped
   - 7 = Not for sale
   The interrupted dial tone sounds.

4. Press the * key.

5. Dial the Maid ID. If you dial the wrong Maid ID, press the * key and redial the ID.
Display Room Status

Use the Room Status feature to print the status of a room using the Display Module.

To read the status of a room:

1. Press the **Room Status** key.

2. Dial the DN for the room. The DN displays followed by a two-digit code. The first digit indicates the occupancy status:
   - 0 = Room vacant
   - 1 = Room occupied
   The second digit indicates the cleaning status of the room:
   - 1 = Cleaning requested
   - 2 = Cleaning in progress
   - 3 = Room cleaned
   - 4 = Room passed inspection
   - 5 = Room failed inspection
   - 6 = Cleaning skipped
   - 7 = Not for sale

3. Press the **Room Status** key.
Changing the status of a room:

1. Press the **Room Status** key.

2. Dial the DN for the room. The DN displays followed by a two-digit code. The second digit indicates the occupancy status:
   - 0 = Room vacant
   - 1 = Room occupied

   The second digit indicates the cleaning status of the room:
   - 1 = Cleaning requested
   - 2 = Cleaning in progress
   - 3 = Room cleaned
   - 4 = Room passed inspection
   - 5 = Room failed inspection
   - 6 = Cleaning skipped
   - 7 = Not for sale

3. Dial the status code for the room. A three-digit code appears. The first digit indicates the occupancy status, the second is the old cleaning status, and the third is the new status.

4. Press the **Room Status** key.
**Flexible Feature Codes (FFCs)**

Use Table 4 to keep track of the FFCs assigned by your system administrator.

Accessories

IP Phone Key Expansion Module (KEM)

The Nortel Networks IP Phone Key Expansion Module (KEM) is an optional hardware module that provides additional line appearances and feature keys on your IP Phone 2002. You can connect up to two KEMs to your IP Phone 2002, providing a total of 48 additional keys.

For more information about the IP Phone Key Expansion Module, consult the “Nortel Networks IP Phone Key Expansion Module (KEM) User Guide”.
Terms you should know

Attendant
A telephone operator in your organization.

AutoDial
A telephone number programmed on the AutoDial key for one-touch dialing.

Callers List
A list of all incoming calls (maximum 100 entries).

Calling Party Name Display (CPND)
Information appearing on the LCD display screen such as the caller’s name and telephone number. The system must have CPND enabled.

Category 5 (CAT5)
Balanced 100 Ohm cable and associated connecting hardware whose transmission characteristics are specified up to 100 MHz. It is used by 10BaseT, 100BaseT4, and 100BaseTX installations. The cable normally has four pairs of copper wire. Category 5 is the most popular cable used in new installations today.

Communication Server 1000
An office communication system.

Date/Time display
The current date and time when the telephone is in an idle state.

Directory key
Enables access to Corporate Directory, Personal Directory, Redial List, and Callers List.
Terms you should know

Directory Number (DN)
A number consisting of one to seven digits for a telephone. Also known as an extension number.

Expand to PC
A fixed key on your telephone reserved for future feature development. An audible non-working tone is generated along with a display message “Service not available” if this key is pressed.

Fastbusy
A signal given when all outgoing lines are busy.

Feature display
An area that shows status information about the feature in use. It also displays the name and status of the active session.

Fixed key
The hard-labeled keys on your telephone.

Flexible Feature Codes (FFCs)
Specialized codes entered using the dial pad that enable features (for example, Automatic Wake-Up call).

Goodbye key
A fixed key used to end an active call.

Handsfree
A method of conversing with the party on the other end of the line without lifting your handset.

Headset key
A fixed key used to answer a call using the headset.
Hold key
A fixed key used to place an active call on hold.

Information display
Any display of call activity, lists, prompts, and status of calls. On the IP Phone 2002, the information area is a 1-line by 24-character display. If the text message exceeds this area, a scroll arrow icon indicates that you must use the scroll keys to view the remaining text.

Information line
A 1-line by 24-character area that displays date and time or application information.

Interrupted dial tone
A broken or pulsed dial tone, heard when you access some features on your telephone.

IP Phone Key Expansion Module (KEM)
An optional hardware module which provides additional line appearances and feature keys to your IP Phone. Up to two KEMs can be attached to your IP Phone 2002, providing a total of 48 keys.

Message (Inbox)
A fixed key which connects to your voice messaging system when the key is pressed.

Message waiting indicator/Incoming call indicator
An LCD or an LED that indicates the status of a feature by the flash, wink, steady on, or off.
Terms you should know

More..

An option allowing access to the multiple layers of the soft keys. Soft keys are the four keys located directly below the display area.

Mute key

A fixed key used to listen to the caller without transmitting.

Navigation keys

Up/Down and Left/Right keys used to scroll through menus and lists appearing on the LCD display screen.

Off-hook

Any line selected to make a call or receive an incoming call. The term *off-hook* is applied whether (a) the end-user lifts up the handset, (b) the end-user presses a line key, (c) the call is automatically answered at the set, or (d) a line is automatically selected for an outgoing call.

Outbox/Shift

A fixed key reserved for future feature development. An audible non-working tone is generated along with a display message “Service not available” if this key is pressed.

Paging tone

A special tone heard when using the Radio Paging feature. You hear two beeps followed by dial tone.

Password Admin

A menu used by you and the system administrator to change your Station Control Password (SCPW).

Personal Directory

A list of user-defined names and numbers (maximum of 100 entries).
**Primary directory number**

The main extension number on your telephone.

**Private Line**

A feature that can be assigned to your telephone. With this line, you can reach an outside number without dialing a code to access an outside line. Internal extensions cannot be dialed from a private line.

**Programmable line (DN)/feature keys (self-labeled)**

The four keys located at the sides of the upper area of the display.

**Quit key**

A fixed key on your telephone that is used to exit applications.

**Redial List**

A list of previously dialed telephone numbers (maximum 20 entries).

**Ringback/ring tone**

A sound indicating that a call you have made is ringing at its destination.

**Secondary directory number**

A second incoming/outgoing line for your telephone.

**Services key**

A fixed key used to access options such as Telephone Options, Password Admin, Display Network Diagnostics Utilities, Virtual Office Login, Virtual Office Logout, Test Local Mode, and Resume Normal Mode.

**Shared directory number**

A DN (extension) that is shared by two or more persons.
Terms you should know

Soft keys (self-labeled)
A set of keys programmed by your system administrator. These four keys located directly below the display area have four programmable layers. The layers are accessed through the More.. key. These keys are also used to configure parameters in the Telephone Option menu.

Speaker key
A fixed key used to activate Handsfree.

Special dial tone
The three consecutive tones followed by dial tone that you hear when accessing telephone features.

Station Control Password (SCPW)
Enables security features on your phone to prevent others from making calls from your telephone and to prevent access to your Personal Directory, Redial List, and Callers List.

Status Messages
A message displayed to inform the user of important information. A right arrow appears if more than one Status Message is present. Examples of Status Messages include: Message Waiting, All Lines Forwarded to: 6453, Do Not Disturb On, Ring Again active, Ringer is OFF, and Line x Unavailable.

System or Switch
Your office communication system.

Switchhook
A button that the handset presses down, disconnecting your call when you replace the handset. The handset (when lifted) releases the switchhook and you either answer an incoming call or you receive a dial tone to make a call.
User Interface

Screen displays that interact with the end user as a result of an action or event.

Volume control bar

A rocker bar you press to increase or decrease the volume of the ringer, handset, headset, speaker and the Handsfree feature.
