**FAQ**

**How do I register minutes?**

Do not register e. g. 2:17 or 4:49.
Later, when you see these time entries in reports, you will see them as 2.28333 hours and 4.81667 hours.
Instead, use only multiples of quarters of an hour:
2:15, 2:30 or 2:45.
This will result in 2.25, 2.50 and 2.75.
You will hardly need to register with an accuracy of 1 minute.
