”

”Entrepreneurial tools have been extremely helpful for my colleagues and me as we have developed our research project CollaboLearn. The project is an intersectorial collaboration with public and private sector partners. Discussing the entrepreneurial dimension of the project with The Kitchen has helped us define our research project, design the collaboration processes with our partners, and find the right funding partners. Furthermore, we have gained a new vocabulary that adds value to the way we work.”

Ella Paldam, Postdoc, Interacting Minds Centre
