

RISIK MATRIX:		Consequences/Impacts				
		1 Insignificant (no injury)	2 Minor (Minor injury, can keep on working)	3 Significant (Injury, but a reversibel injury)	4 Major (Injury, irreversibel injury, for life)	5 Severe (Fatal injuries)
Probability	5 Almost Certain	5	10	15	20	25
	4 Likely (It is happened before)	4	8	12	16	20
	3 Rare (Incidents, have heard about it in another lab.)	3	6	9	12	15
	2 Unlikely (Not happen, but heard about worldwide)	2	4	6	8	10
	1 Rare (Happened 100 år years ago)	1	2	3	4	5

1-5	Very little risk – acceptable, no measures.
6-9	Little risk – acceptable, minor changes.
10-14	Medium risk – some parameters should be changed! Possibly introduce measurements.
15-20	High risk – Unacceptable – must be changed immediately, the work cannot continue!
21-25	Very High risk – Unacceptable – the work must be stopped immediately!
