

Setup of Functional Mailboxes

Before you can file from a functional mailbox, you need to ensure that the functional mailbox is properly connected to your Outlook.

This guide explains how to set up your functional mailbox so you can use WZFO or WZ365 to file from a functional mailbox.

To ensure that deleted emails from the functional mailbox are moved to the functional mailbox's Deleted Items folder, you must request the following policy from your local IT support: AU-Person_Users_OL2016-Shared-mailbox-deleted-items-fix

Instruction	Explanation	Navigation
Linking a Functional Mailbox	 Open Outlook Select the "File" tab Select "Account Settings" Select "Account Settings" again You will now see a list of email addresses linked to Outlook. Only your personal email address should be listed.	Account Settings ~
Remove Functional Mailboxes	If functional mailboxes appear on the list, follow these steps: - Select the functional mailbox - Click "Remove" - Repeat until only your personal email address is listed	
Link the Functional Mailbox	Now Link the Functional Mailbox to Your Personal Email: - Select your personal email - Click "Change" - Click "More Settings" - Select the "Advanced" tab - Click "Add" - Add the desired functional mailboxes - Click "OK" - Click "OK" again - Restart Outlook You can now file from a functional mailbox in the same way as you file from a personal mailbox using WZFO or WZ365. Please note that filed emails will not display with a category in a functional mailbox when using WZ365.	Email Data Files RSS Feeds SharePoint Lists Intermet Calendars Published Calendary Rev.
