Guidelines for "Clearing caches"

The clearing of caches only results in clearing caches for the particular browser. This document is a guideline on how to clear caches for the most used browsers: Firefox, Chrome, Internet Explorer 11 and Safari.

Firefox

- Click on the icon ≡ in the top-right corner and press **Options** in the dropdown menu.
- Choose **Privacy & security** in the menu on the left side.
- Under the section **Cookies and Site Data** click on the button **Clear data**.
- Check the boxes **Cookies and Site Data** and **Cached Web Content** and click on **Clear**.
- The cache has now been cleared. Restart the browser.

Chrome

- Click on the icon ⋮ in the top-right corner, choose **More Tools** and **Clear browsing data**.
- Choose the time range **All time** by using the dropdown-menu.
- Choose the check marks for **Cookies and other site data** and **Cached images and files**.
- Press on the button **Clear data**.
- The cache has now been cleared. Restart the browser.

Safari

- Go to the top of the Safari-menubar and select the tab **Develop**.
- Click on the line Empty Caches.
- The caches has now been cleared.
- Shut Safari down and start the browser again.

Microsoft Edge

- Click on the icon ⋯ , choose **Options** and choose **Clear browserdata**.
- Check the boxes **Temporary Internet files** and **Cookies**.
- Click on the button **Clear**.
- The cache has now been cleared. Restart the browser.

Internet Explorer 11

- Click on the icon ⚙, choose **Safety** and choose **Delete browsing history**.
- Check the boxes **Temporary Internet files** and **Cookies**.
- Click on the button **Delete**.

- The cache has now been cleared. Restart the browser.
